FIRST USE

- It is recommended to wash the bartender kit before first use. Though the packaging process are clean and safe, there may be dust settled during transport.

CLEANING

Bartender Kit are dishwasher safe, however we still recommend hand washing.

- Warm with warm soapy water.
- Use soft sponge or cloth. Using steel brush and harsh chemicals may tarnish the surface.
- Leave to air-dry. Drying the kit with cloth can retain grease and become a breeding ground for germs.
