

Portable Hot Stone Massage Kit

Water-Free Stone Heater Bag with 12 Basalt Stones

USER GUIDE

PLEASE MAKE SURE THAT YOU HAVE READ THE MANUAL CAREFULLY BEFORE USING IT.

Product Details

A stone massage is a massage that uses smooth, flat, and heated rocks placed at key points on the body. With the only professional option on the market being a hot stone water heater, we looked to create something unique and flexible enough to open hot stone massage up to possibilities that have not been options before.

Product Description:

Benefits of the Bag

Not only does the Bag take less time to set up, but unlike a water stone heater, the bag can be transported whilst retaining heat even after its been disconnected from the mains, allowing the therapist to preheat the stones at home, thus saving time (and money!) at the clients house.

Dual-powered: As well as being powered by an AC power supply, the bag also features a car lighter adaptor, allowing the stones to be pre-heated in transit.

Storage: The **Portable Hot Stone Massage Kit** is around half the size of a small water heater! This allows for easier and more convenient storage in spas, colleges, therapy rooms, beauty salons and even at home.

Mobility: The size of the bag also allows for easier transport and deployment than the current available heating equipment.

Maintenance: Unlike existing water stone heaters, the Bag does not require regular cleaning due to limescale build-up.

Greener: Compared to existing water stone heaters, the Bag uses less power to heat, no water and is manufactured using a fraction of the metal used in water stone heaters.

About Hot Stone Massage

The application of warmed Basalt stones combined with manual massage to provide the client with a deeply relaxing, therapeutic experience. The technique utilises smooth warm (basalt*) stones in the therapist's hands to massage the client's body; the heat gently penetrating the skin and muscles, helping the recipient to relax quickly and effectively. Aromatherapy, Reflexology and MLD, along with many other techniques, can be combined with hot stone massage.

How to Use

1. Put massage stones or bamboo sticks inside the small box
2. **A:** Connect temperature controller
B: Connect the power cord and set the temperature you like, after a few minutes you can use the hot stones or bamboo sticks for spa massage.

Using the car adaptor, the bag can be connected to the 12V car lighter socket to maintain the temperature of the preheated stones during travel. At your destination the heated stones are ready for immediate use. Once the stones have been used, place them aside in a washable container ready to be washed for their next use. The obvious advantage of PSLMSGST40 is that finally there is a way to make hot stone massage mobile.

WARNING

1. Ensure to use in a dry environment, heating system is not waterproof.
2. This product requires professional use
3. The Portable Hot Stone Massage Kit should be keep away from high temperature environment and point-blank sunshine.

Features:

- Hot Stone Massage System
- Simple Electric Plug-in Design
- Quick Setup: All-in-One Portable Kit
- Smooth & Sculpted Round Basalt Rock Stones
- Uniquely Selected Stone Type for Comfort & Maximum Heat Retention
- Storage/Travel Bag Doubles as Stone Heating Oven
- Wired Temperature Controller Unit
- Digital LCD Display with Selectable Temperature Setting
- Energy Efficient Warming Bag Quickly Heats Up
- Portable Style Travel Bag, Lightweight & Easy to Carry
- Melt Away Stress to Soothe Muscle Tension, Soreness, Stiffness
- Heated Stone Massage Relieves Pains Caused by Sprains & Strains
- Ideal for Athletes, Home Care and Therapeutic Spa Centers
