LARGE TV/MONITOR TRIPOD

PTVSTNDPT3211

Thanks for choosing this large TV/monitor tripod

Before you start to assemble this with your device please check the mounting holes are correct and the size of the monitor and the weight of the monitor is correct.

Normally for assembling this stand with your TV/Monitor, you need have two persons as some TV/Monitor is heavy or big.

The stand itself has been already assembled so you only need mount panel with the monitor or TV, so when you the box you will a complete stand with the separated bar and some hardware for mounting the panel to the TV or monitor. Also you only need make some small changes if you want to install the cross bar for microphones and small device like TV box.

If you don't like to install the cross bar, do as below instruction:

You can place down the stand and mount the panel with the back of your TV/Monitor, you need choose the right bolts and right hole distance to match the VESA holes of the TV/Monitor, then just stand up this tripod. Expand the legs as wider as you can to be stable. Adjust knob in the middle to the height you need and insert the lock pin to be safe. Adjust the angle via the knob in the top to the better view angle you need and tighten it. You can also turn the monitor left right a little if you need

When you move the stand, it is better hold the TV firstly to be safe.

If you want to have install the cross bar do as below. You need loosen the knob in the middle and pull the top tube out of the base. Then insert the cross bar from the bottom of the top tube.

Insert back the top tube into the base tripod then start to assemble the TV/monitor as the above Adjust the height and angle you need and tighten the knobs to fix the height and angle. You can mount your TV box or other device on the small platform, you can use the included glued Velcro to prevent the device from sliding off. You can mount the microphone on the ring in the end of the cross bar or you can hang your headphone one the bar.
